DYNAMIC-2S [DT-DYN-2S] - ON WALL PROJECTOR SCREEN WITH 2 WAY MOTORISED SIDE MASKING

The DT Screens Dynamic-2S is an on wall projector screen featuring 2 way motorised side masking, Mask Position Logic based control and Whispertec motor technology.

The Dynamic-2S supports 2 way motorised side masking allowing perfect framing of aspect ratios in the range 1.33 to 2.40:1. This variable width and constant height masking maximises the impact of movie content.

The Mask Position Logic (MPL) system is a proprietary development of DT Screens and enables the Dynamic-2S to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

The proprietary Whispertec motor system runs at just 30dB which makes the Dynamic-2S the quietest masking screen in operation.

Example Drawing of Dynamic-2S

DT Screens is a division of Display Technologies, a British company specialising in advanced projector screens, mounting brackets and custom installation solutions. Our focus on the combination of technical performance and design for install, ensure that all DT Screens meet the needs of both the client and the installer.
