Dynamic-2TB Screen - Front view

DYNAMIC-2TB [DT-DYN-2TB] - ON WALL PROJECTOR SCREEN WITH 2 WAY MOTORISED TOP AND BOTTOM MASKING

The DT Screens Dynamic-2TB is an on wall projector screen featuring 2 way motorised top and bottom masking, Mask Position Logic based control and Whispertec motor technology.

The Dynamic-2TB supports **2 way motorised top and bottom masking** allowing perfect framing of all aspect ratios in the range 1.78 to 2.70. This constant width and variable height masking maximises the impact of all TV content.

The **Mask Position Logic (MPL) system** is a proprietary development of DT Screens and enables the Dynamic-2TB to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

The **proprietary Whispertec motor system** runs at just 30dB which makes the Dynamic-2TB the quietest masking screen in operation.

Example Drawing of Dynamic-2TB

DT Screens is a division of Display Technologies, a British company specialising in advanced projector screens, mounting brackets and custom installation solutions. Our focus on the combination of technical performance and design for install, ensure that all DT Screens meet the needs of both the client and the installer.
