Dynamic-2S-AM Screen

DYNAMIC-2S-AM [DT-DYN-2S-AM] - ON WALL PROJECTOR SCREEN WITH 2 WAY MOTORISED SIDE MASKING AND RETRACTABLE ARTWORK MASKING PANEL

The DT Screens Dynamic-2S-AM is an on wall projector screen featuring 2 way motorised side masking, retractable artwork masking panel, Mask Position Logic based control and Whispertec motor technology.

The **Dynamic-2S-AM** supports **2 way motorised side masking** allowing perfect framing of aspect ratios in the range 1.33 to 2.40:1. This variable width and constant height masking maximises the impact of movie content.

The **Dynamic-2S-AM** supports a **retractable artwork masking panel** that both protects the image surface and gives a striking visual feature when the screen is not in use. There is a wide range of standard artworks available and any customer supplied image can be printed on the acoustically transparent panel.

The **Mask Position Logic (MPL) system** is a proprietary development of DT Screens and enables the Dynamic-2S-AM to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

The **proprietary Whispertec motor system** runs at just 30dB which makes the Dynamic-2S-AM the quietest masking screen in operation.

Example of Dynamic-2S-AM Art Mask

DT Screens is a division of Display Technologies, a British company specialising in advanced projector screens, mounting brackets and custom installation solutions. Our focus on the combination of technical performance and design for install, ensure that all DT Screens meet the needs of both the client and the installer.
