

DL Flyers Printing Specification

PLEASE READ CAREFULLY BEFORE PRINT. Following the rules below is recommended during the printing process to keep DT brand consistency.

All marketing materials dedicated for print shared by Display Technologies Ltd are already prepared to send to printers. High quality of document is kept, CMYK colour palette is maintained and there is extra 3 mm bleed with crop marks to indicate net size of the flyer.

DL flyers are double sided, where each page has net size of 210 x 99 mm.

DL flyer document:

DL flyers are double sided, where each page has net size of 210 x 99 mm. Every page has 3 mm bleed included.

DL flyer print settings:

The flyers are meant to be printed as double sided, thick paper in full colour.

To keep the flyer style use:

- DL size (210 x 99 mm/ 8.2" x 3.9")
- double sided print
- full colour (4/4) CMYK print,
- paper thickness/weight of 300 gsm
- Silk or Matt white paper finish

All rights to the described document are reserved to the copyright owner, Display Technologies Ltd. Except print within the above rules, any other modification or redistribution is forbidden.

Please contact us before print in case of any concerns (info@displaytechnologies.co.uk).
